

## Document Manager

Consider the Document Manager as your storage closet for all types of documents. Such documents could include lectures, presentations, reports, and so forth. SchoolCenter's program supports just about any type of file on the market. The only thing to remember is there is a maximum limit of 7MB per individual file.

**Example:** A Document Manager is best used as a place to store information. For example, it can be used to store Human Resource documents. It can also be used to keep employment applications, which can then be downloaded and filled out. It is also a place to store podcasts and allow people to subscribe to the page.
